

astrophotography guide camera pdf

Cooled CCD cameras produce better images than uncooled CCD cameras because cooled CCD cameras produce less noise in the image and hence the image is clearer and contains more detail compared to images taken with an uncooled camera. An example of this type of camera is the Orion Star Shoot Pro Deep Space CCD Camera. This type of astrophotography is

AN INTRODUCTION TO ASTROPHOTOGRAPHY

produces an image of the camera's noise and hot pixels. Set the time and ISO to match the light images. Keep the camera at about the same ambient temperature as the light images. During processing, the dark frame is subtracted from the light frame. This removes the hot pixels and inherent camera noise. Take at least as many darks as lights ...
