A screw is a type of fastener, in some ways similar to a bolt (see Differentiation between bolt and screw below), typically made of metal, and characterized by a helical ridge, known as a male thread (external thread). Screws are used to fasten materials by digging in and wedging into a material when turned, while the thread cuts grooves in the fastened material that may help pull fastened ...

Table 2, based on the Army's 77 BCT program, shows the changes in terms of Army battalions. The Army's decision to increase the number of maneuver companies in its modular heavy BCT battalions from three to four makes it necessary to consider the number of combat maneuver companies as well as the number of battalions.
