Mental imagery plays a significant role in guiding how we feel, think, and even behave. These mental simulations are often guided by language, making it important to understand what aspects of language contribute to imagery vividness and consequently to the way we think.

Using a foreign language reduces mental imagery

Research on exposure to television and movie violence suggests that playing violent video games will increase aggressive behavior. A meta-analytic review of the video-game research literature reveals that violent video games increase aggressive behavior in children and young adults.

In 2013 I retired as director of the Laboratoire Psychologie de la Perception (LPP), which studies human perception both in babies and adults. Since then I have been pursuing a 5-year European Research Council Advanced project ("FEEL") on the sensorimotor approach to consciousness and "feel". With a group of 3-8 postdocs and assistants we have been working to develop the sensorimotor theory on ...
