

fresh water diatoms in pdf

Reproduction and cell size. Reproduction among these organisms is asexual by binary fission, during which the diatom divides into two parts, producing two "new" diatoms with identical genes. Each new organism receives one of the two frustules - one larger, the other smaller - possessed by the parent, which is now called the epitheca; and is used to construct a second, smaller frustule, the ...

Diatom - Wikipedia

1. Introduction. The ongoing global warming has been responsible for the rising temperatures and loss of sea ice in the arctic, which affects all natural habitats in the region (Kaufman et al., 2009). That is why there is a pressing need to improve our knowledge of both the short- and long-term natural climate variability in the Arctic environment to understand ongoing global climate change.

Diatoms in Arctic regions: Potential tools to decipher

Seawater contains more dissolved ions than all types of freshwater. However, the ratios of solutes differ dramatically. For instance, although seawater contains about 2.8 times more bicarbonate than river water, the percentage of bicarbonate in seawater as a ratio of all dissolved ions is far lower than in river water. Bicarbonate ions constitute 48% of river water solutes but only 0.14% for ...
