INTRODUCTION This information and guidance was prepared, in consultation with the Health and Safety Executive (HSE), by a working group representative of all sides of the mining industry.

### **The prevention and control of fire and explosion in mines**

Subsidence is either the sudden sinking or gradual downward settling of the ground's surface with little or no horizontal motion. The definition of subsidence is not restricted by either rate, magnitude, or area involved in the downward movement. Subsidence may be caused by either natural processes or human activities.

Coal mining in the United Kingdom dates back to Roman times and occurred in many different parts of the country. Britain's coalfields are associated with Northumberland and Durham, North and South Wales, Yorkshire, the Scottish Central Belt, Lancashire, Cumbria, the East and West Midlands and Kent. After 1970, coal mining quickly collapsed and practically disappeared in the 21st century.
