Pityriasis rosea is a type of skin rash. Classically, it begins with a single red and slightly scaly area known as a "herald patch". This is then followed, days to weeks later, by a pink whole body rash. It typically lasts less than three months and goes away without treatment. Sometime a fever may occur before the start of the rash or itchiness may be present, but often there are few other ...

This is a convenient new review e-book, consisting of nearly 1000 case-based problems. Whether you're studying for the board, recertifying, or just looking for a convenient way to make sure your patient-care skills stay sharp, this internal medicine self assessment tool makes review easy and enjoyable.

Board Review from Medscape: CASE-BASED INTERNAL MEDICINE

INTRODUCTION. Hematuria that is not explained by an obvious underlying condition (eg, cystitis, ureteral stone) is fairly common. In many such patients, particularly young adult patients, the hematuria is transient and of no consequence []. On the other hand, there is an appreciable risk of malignancy in older patients (eg, over age 35 years) with hematuria, even if transient [].
