How Science Has Revolutionized the Understanding of Drug Addiction For much of the past century, scientists studying drugs and drug use labored in the shadows of powerful myths and misconceptions about the nature of addiction.

### **Preface | National Institute on Drug Abuse (NIDA)**

Important to remember, though, that these people didn't have writing, books, computers, tools, mechanisms, et c. and all the things that modern humans can utilise as off-board memory.

BRAIN RULE RUNDOWN. Rule #2: The human brain evolved, too. The brain is a survival organ. It is designed to solve problems related to surviving in an unstable outdoor environment and to do so in nearly constant motion (to keep you alive long enough to pass your genes on).

### **Survival | Brain Rules**

BRAIN RULE RUNDOWN. Rule #10: Vision trumps all other senses. We are incredible at remembering pictures. Hear a piece of information, and three days later you'll remember 10% of it.

### **Vision | Brain Rules**

The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 10â€“20 billion neurons, and the estimated number of neurons in ...

Neuroplasticity, also known as brain plasticity and neural plasticity, is the ability of the brain to change throughout an individual's life, e.g., brain activity associated with a given function can be transferred to a different location, the proportion of grey matter can change, and synapses may strengthen or weaken over time.. Research in the latter half of the 20th century showed that many ...

Where Am I? by DANIEL C. DENNETT. Now that I've won my suit under the Freedom of Information Act, I am at liberty to reveal for the first time a curious episode in my life that may be of interest not only to those engaged in research in the philosophy of mind, artificial intelligence, and neuroscience but also to the general public.
